**Title:**

Project Dream Eater

**Logo:**

**Home page introduction:**

Pokémon seems to be notorious for having visual and sound effects that harm children, if on purpose or on mistake. I believe that GameFreak, the company that makes Pokémon games, is making these effects to mind control children. Childrens' minds aren't fully developed and can be molded by the simplest ideas. The fictitious organization that is presenting this material is the marketing team at Gamefreak. They are trying to sell more useless and crap merch to children. So, they have been experimenting with sound frequency and visual cues to try to trick children into begging for more Pokémon merch.

**"About" Page:**

This page will inform people on the “research” and failure that Project Dream Eater had on people and the company.

### **3 Pieces of "Research":**

- The Power of Music: Mind Control by Rhythmic Sound
  - <https://www.scientificamerican.com/blog/guest-blog/the-power-of-music-mind-control-by-rhythmic-sound/>
- Scientists Develop New Tool That Achieves Mind Control Using the Power of Light
  - <https://www.ign.com/articles/mind-control-using-light-new-tool-developed-by-scientists>
- ChatGPT Fake Report
  - This report delves into the psychological phenomenon surrounding flashing images and their potential impact on cognitive functions. While the idea of flashing images controlling one's mind might seem reminiscent of science fiction, there exists a body of research suggesting that rapid visual stimuli can indeed influence perception, attention, and even behavior. This report explores the mechanisms underlying this phenomenon, its implications for various fields, and considerations for ethical and responsible use.

### **The Product**

“Is Your Child Being Mind Controlled?”

A counseling service that checks and sees if your child is under the influence of some sort of mind control.

### **The Conclusion**

Big corporations have all the power in the world and can get away with murder. Being aware that incidences like this can happen and have great effects on the young, makes parents more observant of what their child watches.

### **Images**

Source: <https://www.gaia.com/article/neuroscience-in-advertising-when-does-it-become-mind-control>

More to possibly come.

### **Videos or Audio**

Maybe making an audio file that interviews a former employee of Project Dream Eater to learn their experience.
